

A

Native co-products do not rescue closure

**B**

Effective causal factorization

$$A = U_A \Sigma_A V_A^T$$

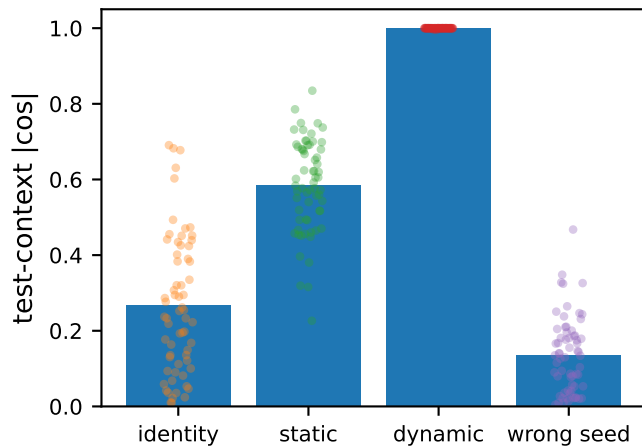

$$B = U_B \Sigma_B V_B^T$$

$$H = \Sigma_B V_B^T U_A \Sigma_A$$

$$C_{dyn} = V_A V_H U_H^T U_B^T$$

C

Calibration-to-test transfer

**D**

Specificity of dynamic closure
